## TECHNICAL SKILLS

- JavaScript
- HTML5
- CSS3
- React.js
- SQL
- Angular8
- PostgreSQL
- Node.js
- Bootstrap
- Reactstrap
- DynamicWeb

## PROJECTS

### Winnebago.com | DynamicWeb | Manufacturing Retail

- Designed and implemented a **dynamic web application** for [Winnebago.com](https://www.winnebago.com), enhancing user engagement and content management.
- Collaborated with end users to gather requirements and ensure delivery of impactful features.
- Modernized legacy code and introduced new functionalities, adhering to best practices.
- Partnered with cross-functional teams to deliver complex full-stack solutions.

### Dealer Portal | AngularJS Application | Manufacturing Retail

- Dealer Portal connects authorized Winnebago dealers with part manufacturers to replenish their inventory
- Used AngularJS to control informational flow balancing users, inventory, invoices, and claims
- Connected separate API repository where requests are made and to Microsoft Azure Database

### Fraud Connect | React Application | Anti-Fraud Software

- Used React to write screens, develop features, enhance user experience
- Interacted with API to send and retrieve data from the backend
- Implemented Redux as a store solution for data across components
- Tested written code with React Testing Library

### SmartRemit | Angular 11 Application | Banking Solutions

- Developed UI screens handling transaction data
- Interacted with several backend microservices to handle app communication
- Utilized AG-Grid to display and organize data to the user
- Wrote unit tests to mitigate bugs in release
- Presented completed stories to shareholders at sprint end

### Transom | Angular 7 Application | Supply Chain/Logistics

- Used Angular to write and develop screens handling freight data
- Wrote code in multiple modules part of a complex application structure
- Tested components using Jest, Looper, and Cypress Automation
